DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/4/02 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1 and 2 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly amended claims citing "said embedded data is non-orthogonal to the visible data" is deemed new subject matter since the examiner can find no support within the specifications to corroborate the new limitations.

Art Unit: 2876

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

5. Claims 1, 3, and 4, drawn to the apparatus, and method claims 2, 5, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Rhoads (US 6,122,403).

Rhoads teaches a computer 942 generating a master snowy image 972 which is added to a raw image 970 to produce a unique image which is printed onto a personal cash card 950. The master snowy image 972 of the unique image is obscured. Authenticating the card 950 may be done on a scanning system by decoding the image and displaying the decoded data on a local computer screen (col. 60, line 64- col. 64, line 23).

Response to Arguments

6. Applicant's arguments entered 4/4/02 have been fully considered but they are not persuasive since new cited limitations are deemed new subject matter.
